## NEW KEY COMBINATION

Final K                    -BG

### Rule

Usually we use -Z for adding -s to the end of a word. But for steno ending in -K we use -S, not -Z.

### Rule

Often a name gets an asterisk to distinguish it from a word. In this theory the less-common choice gets the asterisk. If it's unclear which is more common, the asterisk goes with the name. Examples are shown below.

Bill	PW*EUL	jack	SKWRA*BG
